Gary,
Lonestar Ecology is a discharger to GCA's Bayport Facility.
I oversee the Washburn Tunnel Facility. While I can't really push anything through,
The appropriate people will be made aware of your concern.
Thank you,
Greg N. Seay

Greg:
We are shipping contaminated oily water to you guys through Lonestar Ecology. We seem to be have trouble with getting final approval on a waste stream due to your approval system being down. It has apparently been verbally approved but until it gets into your system we can't ship. Is there a chance you can push this through so we can begin moving this material?

Thanks
Gary Moore
